

Downloading and using Sketch

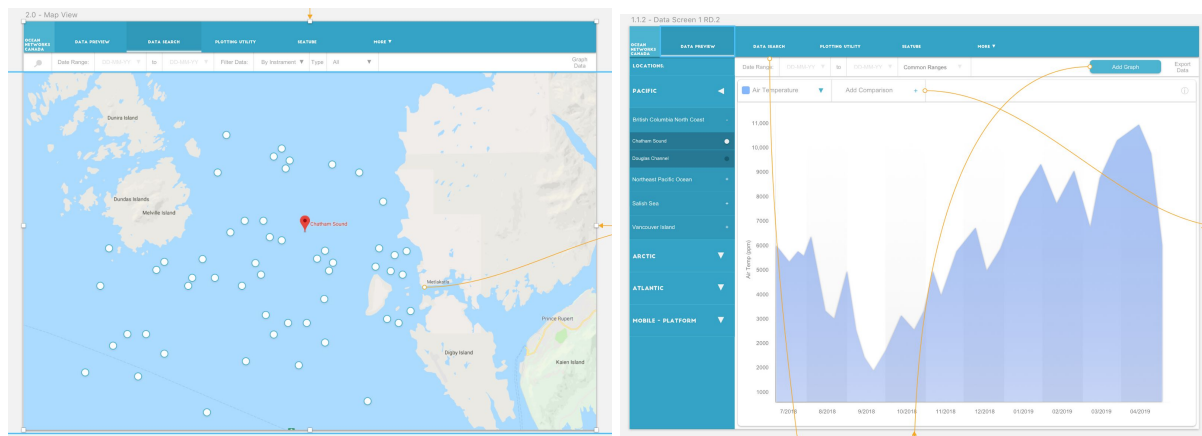

Sketch is the software that we used to create our prototype app. If you're interested in looking at our app you will need to download it from here: <https://www.sketchapp.com/>

Although it is paid software there is a 30 day free trial.

Once you've downloaded the app you can work through the prototype in sketch by selecting a screen and clicking the Preview button.

In order to progress through the prototype naturally you should first select the map screen or the initial data preview screen, as seen below.

That said, you can see the arrows that show where each selection area will take you.
